MINING NOTES.

T. M. and M. Co.

Work is progressing steadily in the several properties owned by this company. Under its excellent management each month shows a large addition to the number of feet of prospecting work, every dollar of which by economic conduct is paid for by the current output. In the meantime the treasury of the company is being augmented and the properties placed in prime condition for future development at greater depth. Since the tapping of the East Side ledge from the Lucky Cuss shaft work on both the north and south drifts has been continuous. The ledge is well defined strong and indications therein good. In the upraise which is being driven in the north drift for air connection 160 feet from surface the indications are especially good. A trip through the Northwest shaft (Toughnut) shows progressive work and good ore. Over 1800 feet of dead work has been done from this shaft during the past year, and a formerly deserted cryptogram of working again transformed into a producer, as every dollar of work in this part has also been liquidated by product and the output continues.

Hermosa, Harshaw.

Mr. James Finley, of the Hermosa, at Harshaw, has just added a larger Huntington pulverizer to his milling plant. The whole concern, which takes the place of stamps, crushes 20 tons per day and is about ten feet in diameter. The smaller one which he has just discarded for this latter one had been in constant use for sixteen months and is still in good condition. Any one doubting the success of the Huntington mill can be satisfied by inspecting this one, which has piled up Mr. Finley's bank account so steadily and successfully.

Crittenden Shipments.

During the year 1889 there was shipped from Crittenden on the N. M. and A. railroad \$127,763 worth of silver, copper and lead ore. This came entirely from chlorides in the Patagonia mountains and is the output exclusive of the bullion produced at the Finley mill at Harshaw.

Ray Copper Mines.

An extension of sixty days has been granted the holders of the option on the Ray group of copper mines.

Washington Camp.

An important strike was made in the Duquesne company's property at Washington camp a few days ago. It was so favorable in its nature as work continued into it that Mr. Rhodes, the superintendent, went to Riverside yesterday to bring back the men who have been working on that property. The most favorable feature of the development is the fact that the zinc has disappeared and the ore body, the extent of which is not known at present, is of an easily smelted character and different from anything heretofore encountered there. Mr. Rhodes wired his company at Pittsburg from Crittenden yesterday of the new discovery.

Our Style.

A special from Tin Cup, Col., says of the new find that the lowest assay obtained thus far has been twenty-two ounces to the ton, and there are specimens that will pan, by pulverizing in a common mortar and washing, at least \$20,000 to the ton. Two men are taking out right now \$5000 worth of metal each day, and they are in the hill only fifteen feet from the surface. From the best information obtainable the four-foot gold streak is worth \$1000 per ton.

Call for Schlitz Keg Beer.

Paul B. Warnkros, has this day received a carload of the celebrated Schlitz Keg Beer direct from Milwaukee. This beer has a widely known reputation on account of its superiority. Mr. Warnkros assures all of his patrons that they can depend on being regularly and permanently supplied with the article. He has rented the ice house and store room of the Crystal Palace Saloon, one of the most convenient locations. All orders left at his store will receive prompt attention. 6-16tf

D. M. Ferry, of seed fame, is registered in Phenix from Detroit, Mich., interested, says the Republican, in a scheme for water development in the upper valley. No Eastern seedsmen should consider his business complete without an Arizona farm whereon to

raise tender plants and bulbs which in the east are injured by frost.

The growth of vegetation in Arizona, in favorable localities, is much more rapid than in California even, and raising plants and bulbs for the Eastern markets proves in that state a very profitable industry.

Strawberries from the Metcalf's ranch received regularly at Wolcott's during the season. Leave orders there.

Flor de Columbus Cigar, the best in the world for a bit. Try them at Lewie's Beer Hall.

Nat Hawke can be found on Allen street next to McDonough and Nobles where he is at all times ready to register voters. 6-28tf

The Prescott ball clubs are the "Sloggers" and "Wind Sweepers."

Indications point to the selection of Charles Smith of this city as a mounted inspector and Mr. A. L. Grow to succeed Harry Carpenter.

J. M. Castenada came up from Benson today.

The murder case of Thos. Hannon has been again postponed in Chas. Granville Johnston's court, owing to the absence of Judge Stilwell.

Mr. Thos Allison and Mr. Gilman came over from Wilcox today.

B. A. Packard is in town from his ranch.

Mr. Chas Wilds is up from St. Davids.

Taken Up.

Two grey horses, one branded H on jaw, 7 cross K on shoulder and V O on hip; the other has Spanish brand on hip and vent on shoulder. Owner can recover them by applying at this office and paying charges. tf

For three months she coughed incessantly and could not sleep. She bought of a bottle of Dr. King's New Discovery for Consumption and was so much relieved on taking the first dose that she slept all night, and with one bottle has been miraculously cured.
